

Rajesh Kodaganti

Redmond, WA | (747) 366-0793 | rajeshkodaganti.work@gmail.com | [linkedin.com/in/rajesh-kodaganti-323118215](https://www.linkedin.com/in/rajesh-kodaganti-323118215)

Software Development Engineer

PROFESSIONAL SUMMARY

Software Development Engineer with a Master of Science in Computer Engineering and hands-on experience building Python-based cloud automation, backend workflows, data pipelines, and AI-powered systems on Azure. Delivered an outage-management pipeline supporting Severity 0-2 incidents across 70+ Microsoft Identity services. Experienced with Azure Functions, KQL, event-driven services, REST API orchestration, RAG, document processing, monitoring, and secure infrastructure as code.

TECHNICAL SKILLS

- **Languages:** Python, JavaScript, SQL, R, C, Embedded C, HTML, Verilog, VHDL
- **Software Engineering:** FastAPI, REST API orchestration, microservices, ETL/data pipelines, JSON, GitHub, CI/CD, testing, troubleshooting
- **Cloud & DevOps:** Azure Functions, Logic Apps, Service Bus, Blob Storage, Key Vault, Application Insights, Entra ID, Bicep, Azure AI Search
- **AI & Machine Learning:** Azure OpenAI, Azure Document Intelligence, RAG, LLMs, NLP, prompt engineering, PyTorch, TensorFlow, MCP

PROFESSIONAL EXPERIENCE

Microsoft

AI Software Engineer (Contract)

Redmond, WA
Oct 2025 - Present

- **Designed and developed a six-phase outage-management pipeline** automating incident ingestion, enrichment, classification, validation, and reporting for Severity 0-2 incidents across 70+ Microsoft Identity services.
- **Built Python Azure Functions and KQL workflows** for IcM data processing, and integrated Azure OpenAI to classify root causes and recurring outage patterns.
- **Automated DRI notifications and escalation workflows** through Logic Apps and generated Excel and Word reports for incident review and operational reporting.
- **Provisioned secure Azure infrastructure** using Bicep, managed identity, Key Vault, Blob Storage, Service Bus, Application Insights, and Entra ID; delivered a dashboard, runbooks, troubleshooting guidance, and knowledge-transfer documentation.

Quadrant Technologies

AI Software Engineer

Redmond, WA
Aug 2025 - Present

- **Architected and deployed scalable AI solutions** with Azure OpenAI and Azure Cognitive Services for threat intelligence analysis and automated mitigation workflows.
- **Implemented Azure Document Intelligence workflows** to extract and structure unstructured data, improving data reliability for downstream machine learning systems.
- **Developed RAG architectures** integrating Azure AI Search with LLMs for accurate retrieval across security vulnerability reports.

Quadrant Technologies

Artificial Intelligence Intern

Redmond, WA
Jul 2025 - Aug 2025

- **Designed ETL and data-ingestion pipelines** for endpoint, network-security, and vulnerability data; analyzed threat intelligence and created cloud-security monitoring dashboards.

QikCell by tickioT

Assistant to Solutions Engineer (Freelance)

Los Angeles, CA
Jan 2025 - May 2025

- **Served as technical liaison for client field trials** and developed Python-based IoT demonstrations for AI-enhanced signal processing and predictive-maintenance use cases.

ColorOS

User Tester (Freelance)

Remote, India
Jun 2018 - Jul 2022

- **Tested ColorOS Beta and Alpha releases** from versions 5.0 through 12.1, documented defects, and proposed product improvements in collaboration with cross-functional teams.

Pantech ProEd Pvt Ltd

Student Intern

Hyderabad, India
Jun 2020 - Jul 2020

- **Contributed to a high-speed 64-bit binary comparator** and optimized design parameters using Verilog and VHDL.

SELECTED PROJECTS

IcM Outage Automation - Microsoft Identity LiveSite

- **Built a six-phase Python Azure Functions and KQL pipeline** for Severity 0-2 incidents across 70+ services; integrated Azure OpenAI classification, Logic Apps escalation workflows, automated reporting, and secure Azure infrastructure provisioned with Bicep.

JobPilot - AI-Powered Job Application Co-Pilot

Feb 2026 - Present

- **Built a JavaScript, Python, and FastAPI application** for AI-assisted job-search workflows; deployed on GitHub Pages through a Cloudflare Worker proxy with client-side AES-GCM encryption.

Sentinel - Autonomous DevOps Orchestrator

Nov 2025 - Present

- **Developed an Azure OpenAI integration** between Jira and GitHub to automate polling and DevOps workflows, with GitHub Copilot and Model Context Protocol integration.

GasOps MTR Extraction

Sep 2025 - Present

- **Built a JSON extraction pipeline** using Azure Document Intelligence and the OpenAI API for AI/OCR orchestration and structured downstream processing.

Image Denoising Using Deep Learning

Dec 2024 - May 2025

- **Developed a dual-domain image-denoising framework** in Python, TensorFlow, and PyTorch; achieved more than 12 dB PSNR improvement at high AWGN levels with a UNet-inspired architecture.

EDUCATION

California State University, Northridge

Aug 2022 - May 2025

Master of Science in Computer Engineering

JB Institute of Engineering and Technology

Jul 2019 - Jun 2022

Bachelor of Technology in Electronics and Communication Engineering

CERTIFICATIONS

Anthropic: AI Capabilities and Limitations; Introduction to Claude Cowork; AI Fluency: Framework & Foundations; Claude with Google Cloud's Vertex AI; Building with the Claude API; Claude in Amazon Bedrock; Model Context Protocol: Advanced Topics; Introduction to Model Context Protocol; Claude Code in Action.

Microsoft: Microsoft Certified: SQL AI Developer Associate; Career Essentials in Generative AI by Microsoft and LinkedIn; Microsoft Certified: Azure Data Scientist Associate; Microsoft Certified: Azure Administrator Associate; Microsoft Certified: DevOps Engineer Expert; Microsoft Copilot for Productivity by Microsoft and LinkedIn; Microsoft Certified: Azure AI Engineer Associate; Microsoft Certified: Fabric Data Engineer Associate.

Atlassian: Atlassian IT Service Management (ITSM) Professional Certificate. **Astronomer:** DAG Authoring for Apache Airflow 3; Apache Airflow 3 Fundamentals.

Docker, Inc: Docker Foundations Professional Certificate. **GitHub:** Career Essentials in GitHub Copilot Professional Certificate.

PUBLICATION

Readers for the Visually Impaired Using Raspberry Pi | IJRAR | May 2022 - Developed a Python and Tesseract OCR prototype that converts printed documents into audio for visually impaired users.
